YOUR 'Triumph®' DEALER

EASY-SAFE CUTTING BY OFFICE PERSONNEL

'Triumph-Jr.'

Now, a junior model has been added to the "TRIUMPH" line of precision-built, sturdy, easy-to-use, office paper cutters.

Features a mechanical innovation that eliminates the turning of a wheel to clamp and unclamp the paper before and after each cutting. One simultaneous motion clamps and cuts the paper. Then, release motion of the cutting handle unclamps the paper automatically. Special SAFETY Feature! The SAFETY latch locks and unlocks automatically, while using both hands in operating . . . one on the clamp handle and the other on the blade handle. So SAFE, so easy and so economical to operate!

No other paper cutter, in this size, offers so many higher priced features at such a low price. Note the specifications chart! Compare the features, the quality and then look at the price. You'll agree that the TRIUMPH Jr. has the really great features that you'll want in your cutter. Even the adjustment of the knife is the easiest of all cutters. A simple hand turn of a knob, located on the left side, raises and lowers the knife whenever necessary (no tools needed).

It's portable . . . it's light-weight . . . any office personnel can move it anywhere and use it immediately. Attractive neutral green shade blends with every modern office decor.

KUTTRIMMER

PAPER CUTTER AND TRIMMER COMBINED

NEW PAPER TRIMMER
CUTS UP TO
50 SHEETS
IN ONE
OPERATION!

Offices and factories everywhere will find the "KUTTRIMMER" an essential aid to efficient operation! Designed to cut up to *fifty* sheets at one time, the "KUTTRIMMER" will prove its usefulness many times over! Simply insert paper—set clamp—pull down cutter handle and up to *fifty* sheets are ready for your use! Check your needs, select from seven different

models; there is a "KUTTRIMMER" designed for you.

"KUTTRIMMER" Suitable for Many Materials
In addition to paper, the "KUTTRIMMER" will cut carbon paper, cardboard, fibreboard, foils, rubber, fabrics, leather, linoleum, felt, thin plywood, thin soft metal and many similar materials.

Perfect for the Photo Lab.

Perfect as a mat trimmer.

"KUTTRIMMER"
**Features Give More
 Service Than
 Any Other Trimmer**

Cuts up to 50 sheets of paper (more than any trimming boards)
 ■ *Hand-operated paper clamp swings aside for trimming special, bulkier materials ■ Paper guide extends to side for fast, clean repeat cuts (calibrated front knob moves guide to divisions of 1/16") ■ Adjustable alignment bar to set width of cut ■ Upper and lower trim guides with metal scales ruled in 1/16th inches for accuracy ■ Standard trim sizes engraved into table to simplify cutting ■ Knife of high quality steel produces high cutting efficiency ■ Floor models 70U, 80U and 110U have foot-operated clamp

*Models: Solid 36, 55, 70 & 80

Floor Model
 Treadle-operated.
 Complete with stand.

PRECISION PAPER CUTTER (PAT. PENDING)

Electric

FOR THE OFFICE ■ FOR DUPLICATING

**TWO
GREAT
SIZES**

Beautifully designed for simple, easy operation, superbly engineered for safety with speed, the TRIUMPH Electric Precision Paper Cutter is a handsome modern office machine that cuts more than any other paper cutter of its size. Cuts over a ream of paper, or over 3" of ledger or card stock in one fast stroke.

It is easy and safe to operate by both male and female personnel.

A unique feature for an electric cutter of this size is the front wheel, which moves the back gauge easily to the desired size. Calibrated to divisions of 1/32 of an inch, it insures perfect cutting every time and allows trims of the narrowest widths to 1/2-inch.

DOUBLE PUSH-BUTTON CONTROL requires use of both hands to assure complete safety plus the added feature of a safety signal light when

the machine is in operation, plus two independent brakes. Machine stops immediately if either hand is removed from the starting buttons at any time during the cutting operation. Machine stops automatically after each complete cutting cycle.

Another Safety Feature: All electric control equipment is effectively enclosed and shielded and all moving parts are guarded. In fact when the machine is in operation, the knife is the ONLY visible moving part. The TRIUMPH ELECTRIC saves electricity costs because the motor runs only when the actual cut is being made. The structure of the machine is sturdy and rugged and is combined with good, practical, modern design. Inspect all its newly engineered features and you'll agree that for low cost and operating economy, the TRIUMPH ELECTRIC is the power cutter for you.

TWO SIZES

15"
21"

"TRIUMPH ELECTRIC" IMPROVED FEATURES FOR BETTER CUTTING OPERATION

EASY OPERATING:	Easy to turn hand clamp. Practically no adjustments . . . only when the knife is sharpened.
STAND:	One piece unitized stand included. Perfect cutting height for tireless operation.
EASY KNIFE ADJUSTMENT:	A turn of the knob raises or lowers the knife (no tools necessary).
EXTRA SAFETY:	Lock and key prevents unauthorized use. Two-handed push-button controls plus two independent brakes, a non-repeat device and front safety light.
FAST CUTTING:	Twenty strokes per minute.
EXTRA CUTTING POWER:	Motor is completely geared to the knife pulling bar. There are no belts and no slippage.
MEASURING:	Calibrated to divisions of 1/32 of an inch.
COMBINATION MOTOR & BRAKE:	Special reversible gear motor with two independent electromagnet brakes.
3-WAY SWITCH:	1. Cutting 2. Reverse 3. Off

IMPORTANT!
MR. DEALER, SHOW THIS TO
YOUR CUSTOMER.

CONSIDER ALL THESE **SAFETY**
FEATURES AND OTHER ADVANTAGES
BEFORE PURCHASING
A COMPACT ELECTRIC PAPER CUTTER.

THE MACHINE SHOULD HAVE a NEW YORK STATE DEPARTMENT OF LABOR SAFETY APPROVED LABEL. This approval is the highest standard of safety in the 50 states, and recognized as such among all the states.

THE MACHINE SHOULD BE operated with push buttons that require the use of both hands, plus

THE MACHINE SHOULD HAVE a NON-REPEAT DEVICE plus INDEPENDENT DUAL BRAKES to stop the knife cold in any position, without any additional movement.

THE MACHINE SHOULD stop automatically after each complete cutting cycle even if the operator has his/her hands on the Starting Buttons.

THE MACHINE SHOULD HAVE LOCK AND KEY so that just not everyone can operate the machine.

THE MACHINE SHOULD HAVE a WORM-GEARED BACK GAUGE with professional adjustments for accurate cutting.

THE MACHINE SHOULD HAVE SERRATED BACK GAUGE so that one can cut behind the knife as small as 1/2 inch if ever needed.

THE MACHINE SHOULD HAVE a ONE PIECE UNITIZED TABLE construction, for added strength and for all-time working safety.

TRIUMPH ELECTRIC PAPER CUTTERS

HAVE ALL THE ABOVE SAFETY FEATURES,

AND ARE FULLY APPROVED IN EVERY STATE OF THE UNION.
